Dedicated Internet Access

A fast, reliable internet connection is critical for today's businesses. Moments wasted on a slow connection or interruption in service is time that your organization can't afford. With Everstream's Dedicated Internet Access, your network connection is not only fast and reliable; it's also symmetrical, scalable and secure.

FASTER FIBER. BETTER BUSINESS.

Dedicated Internet Access | DIA

Dedicated Internet Access (DIA) from Everstream ensures a customer's bandwidth is reserved for their business' needs, delivering consistent performance with a reliable fiber internet connection.

Conversely, internet access from a national cable or phone company is their best-effort service — an arrangement where bandwidth is oversubscribed because not every customer uses their connection to the fullest capacity every minute of the day. Even customers who opt for business class often experience a reduction in bandwidth as additional users log on, causing latency.

- **Dedicated connection**

- **Reliable service**

- **Scalable solution**
