Managed Wave

We understand that fiber is an investment in infrastructure and technology. With an Everstream Managed Wave connection, we've already laid the groundwork for you. This service is available to businesses, carriers and data centers looking for a cost-effective, high-speed connection of at least 1 Gigabit between two on-net locations.

everstream[™]
FASTER FIBER. BETTER BUSINESS.

Managed Wave

- VOICE
- APP
- INTERNET

Managed Wave allows customers to easily connect to the Everstream backbone in buildings where service already exists. This dedicated connection utilizes active Dedicated Dense Wavelength Division Multiplexing (D-DWDM) technology and is available in 1-, 10-, 40- and 100-Gigabit service options.

• **Cost-effective solution**

• **High-speed options**

• **Reliable connection**
